

Bee Creek Soccer Complex

New Sports Lighting:
Integral Driver Assemblies
on Recreational Youth
Soccer Fields

Murray, KY

Project Summary

Lighting Standard

Class III

Level of Play

Youth Recreational
& Select

Size of Field

1x Large (200' x 325')
1x Medium (155' x 220')
3x Small (120' x 175')

Project Situation

The Murray-Calloway County Soccer Association had wanted to light the fields at the soccer complex for many years, but for various reasons it never gained momentum. That changed in 2019, after a brief delay due to the COVID-19 pandemic, when the Bank of Murray generously granted the funds to the City of Murray. Now the MCCSA will be able to increase the number of tournaments they run from 2 to upwards of 10-15 per year. Which brings in additional revenue for the parks system, as well as local restaurants and hotels.

Product Details:

- ✓ 40x 1000W Integral Driver Fixtures with individual controls
- ✓ 14x 60' Mounting Height Direct Buried Concrete Poles
- ✓ Pre-Aimed Fixtures with Pre-Wired Cross Arms
